

Undergraduate Program Review  
Community Health  
2007-2008

**I. Strengths**

1. Initiated in 2000
2. Endorsed by NCHEC
3. Chair now more stable
4. Requirement of "C" for each course
5. Degree plan modifications to tighten and offer flexibility to students
6. EDHL 4331 provides career preparation and volunteer experiences
7. Good advising plan
8. Acceptable scholarly productivity
9. Departmental budget increases and faculty travel expenditures increase
10. Acceptable funding outside the department

**II. Weaknesses**

1. Significant drop in SCH in EDHL
2. Majors not growing significantly
3. Few majors in program (13)
4. Faculty instability and loss of faculty
5. Past instability in chair position
6. Program assessment tools seem underdeveloped
7. Low number of faculty members engaged in scholarly activity and grant submissions

**III. Recommendations**

1. Continue to establish program goals and SLOs specific to NCHEC standards
2. Hire tenure track doctorates in the field and bring pure health faculty to two
3. Retain qualified faculty
4. Recruit majors
5. Upgrade teaching technology
6. Maintain accreditation through NCHEC
7. Acquire accreditation through AAHPERD/AAHE

**Conditional Continuation**—without appropriate faculty and majors the program will not remain viable.
