

Undergraduate Program Review  
Computer Science  
2006-2007

I. Strengths

1. Relationship with the electrical engineering department.
2. Emphasis on software engineering, making the program unique in the South Texas Region.
3. Job performance of graduates.

II. Weaknesses

1. Student enrollment above the first year is low.
2. Lack of adequate funding for the program.
3. Lack of faculty (one).
4. Only five computers that use specialized software are dedicated to upper level students.

III. Recommendations

1. Address editorial and clarification requests in the full review by subcommittee.
2. Emphasize recruitment efforts for transfer students.
3. Provide access to computers with specialized software to upper level students.
4. Subcommittee recommended unconditional continuation of this program.
